

Simplest way to promote your business through Social Media. Automatically share your social content and track your customers' interaction online.

BeSocial automatically shares your messages and promotions through out the day to multiple social networks so that your followers see your updates more often. You can also track your customers' interaction with your social content, and monitor your reputation online and compare it with those of your competitors – all with the push of a single button.

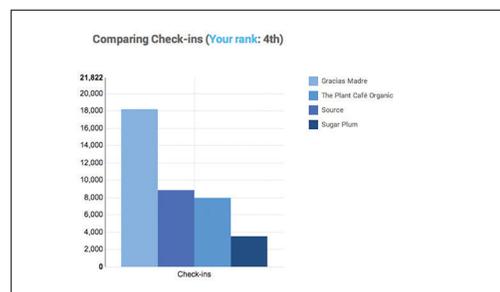

Save time by scheduling posts to Facebook & Twitter. Share your messages, pictures and offers.

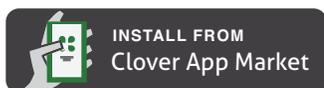

Easily monitor what is being said about your business and ensure your reputation is not being tainted online, and track your competition

Measure the reach of your social messages, and track trends of checkins, followers, tweets, posts and likes

Rank #1 or #5 or in-between? Measure your social rank against the competition on Facebook, Twitter and Foursquare.
